

## TLS16 Undersink Chiller

### Compact Space Saving Refrigerated Water Cooler

A very powerful compact water cooler will supply 16 litres of cold water per hour. It can be installed along with a filtration system or added to an existing filtration system if so desired.

### Features

#### 3 litre Stainless Steel Storage Tank

Designed so that tank can be back washed to remove any sediment build up that may have entered the storage tank.

#### Rounded Ends

To prevent restriction of air flow in condenser if in a confined space.

#### Stainless Steel

Nuts, bolts and screws  
Internal base  
Side panelling

#### Condenser

Forced draft. Corrosion proof treated. Large slow revving fan for quieter operation.

#### Water Pressure

Can be connected to mains water supply or low pressure filtration systems.

#### Water Connections

1/4" BSP inlet and outlet  
Recessed below top and bottom of water cooler to protect water fittings.

#### Refrigerant

R13a refrigerant

#### Electrical

240 volt 50HZ

#### Dimensions (mm)

485 length x 290 width x 320 height

#### Weight

19kgs in carton
